

ENVIRONMENTAL POLICY

The Aqua Mirage Club Marrakech, aware of the need to carry out its activities with respect to the environment, is determined to comply efficiently the following environmental principles:

Respect the environmental legislation applicable in Morocco.

Streamline and make good use of natural resources, to reduce our impact on the environment, to lower resource consumption and promote energy saving and efficiency in our facilities by:

- Installation of energy saving equipment throughout the property.
- Active monitoring of energy consumption to keep it to a minimum.
- Priority to choose sustainable equipment and low power consumption in future purchases.
- Promotion of electricity and water-saving practices to all our employees and guests by posting in rooms, common places and employees locals.
- Overcoming wastage in the production of waste.

Promote actively environmental education and awareness among employees and customers through the separation of different waste streams and an easy access to appropriate recycling bins or a gentle introduction to the youngest of our guests.

Prevent permanently the pollution by implementing all necessary measures to reduce environmental impacts and anticipate potential accidents with an environmental impact.

Train all employees daily on our environmental objectives and their contribution to make in this policy. Encourage customers to support us in our goals through sustainable communication.

Refresh continuously the targets as part of our environmental management system and implementation program by providing information on all actions within our institution.
